

# Documentation of process of conduct of a CME on Disaster Management

Dr Shailaja. S, Dr Hilda S, Dr Nagaraj Bhat, Dr Ashith S, Dr Niveditha T G  
Department of Emergency Medicine, Father Muller Medical College, Mangalore

## Introduction

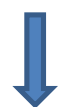

- India is one among the most disaster-prone areas of the World.
- One of the aims of National Disaster Management plan includes proactive preparedness by capacity building in terms of faculty training, mock drills and disaster response exercises.
- Hospital preparedness and training of human resources are the key responsibilities of all hospitals. With this background all tertiary care hospitals are equipped with staff training in Code yellow activities.

## Objective

- To document the conduct of CME on Disaster management and to capture delegate feedback.

## Methodology

Brainstorming of Emergency Faculty

CME, mock drill and with hands on first aid

- Introduction to disaster cycle
- Types of disasters
- Role of Governmental organizations
- Field disaster response
- Hospital disaster response
- Medio legal issues in disasters

Mock drill

1. Field decontamination and Triage
2. Head and Spine Care
3. Wound Care and Hemorrhage control
4. Airway Management
5. Chest injuries
6. Abdominal Injuries
7. Intravenous cannulation

## Results

- 94 participants – Interns, Homeopathy
- 23 Faculty from various specialty
- Mock drill – START triage was filled
- CME Feedback – Speakers and conduct – well appreciated, Hands on sessions – all participants did not get opportunity, food and venue was appreciated, more frequent such programs

## Conclusion

- The comprehensive disaster management workshop, encompassing both theoretical knowledge and hands-on field exercises, demonstrated significant satisfaction among participants.
- Therefore it proves to be an effective model for future disaster management training programs.
