

## Era University Organises Awareness Program on National Dengue Day

On the occasion of **National Dengue Day 16<sup>th</sup> May** an awareness program was organised by the Department of Medical Laboratory Techniques, Faculty of Allied Health Sciences and Research, Era University. The awareness program was monitored by Vice Chancellor Prof. Abbas Ali Mahdi. On this occasion, the students of the MLT department performed a Nukkad Natak on the theme **“Dengue Prevention: *Our Responsibility for Safe Tomorrow*”** in Hunnikhera village, Raipur, Mall Lucknow U.P. The play was facilitated by Slogan, Banner, and poster showing all the necessary measures required for Dengue: prevention and cure. They serve as powerful tools for communication, capturing attention, and conveying messages effectively. This program was conducted under the guidance of Prof. S. Riaz Mahdi, Dean Faculty of Allied Health Sciences and Research, at Era University. The students conducted a rally in which they taught the people of nearby localities about the perils of Dengue. Approximately all the students from B.Sc. M.L.T. 6<sup>th</sup> semester participated with great enthusiasm to help eliminate the dengue and create a healthy environment. The students went from locality to locality and contributed their part by performing the Nukkad Natak. The following objectives were included in the program: To increase awareness effectively among the general public. To educate the community about dengue fever and its consequences. To promote preventive measures to reduce the risk of dengue transmission.

The program witnessed active involvement from various age groups, including school children, parents, and elderly residents. The program was conducted successfully with the presence of Pradhan Rampati Yadav, w/o Siya Ram Yadav. villagers Rajesh Yadav, Jagdev Gautam etc...

The awareness program was successful with the continuous participation and the presence of the faculties **Dr. Ekta A. Andriyas, Assistant Professor**, Head of the Department of Medical Laboratory Techniques, Tanvir Raza Jaffrey, Neetu Kushwaha, Neha Pant, Abhishek Mishra, Kulsoom Bano, Ilma Khan, and Alexander Singh.

The Dengue Awareness Program was successful in spreading crucial information and engaging the community in dengue prevention efforts. Continuous education and preventive measures are essential to combat the spread of dengue fever.
