

ERA UNIVERSITY

DIPLOMA IN RADIOLOGICAL INTERVENTION TECHNICIAN

PROGRAM OUTCOME

1. Demonstrate proficiency in performing a variety of radiological interventions, including angiography, biopsy, and catheter placements.
2. Ensure patient safety during interventional procedures by adhering to protocols and maintaining a sterile environment.
3. Provide compassionate care and support to patients, addressing their concerns and ensuring their comfort before, during, and after procedures.
4. Prepare patients and equipment for interventional procedures, including obtaining informed consent and ensuring proper positioning.
5. Troubleshoot and resolve issues related to image quality or equipment functionality.
