Workshop on Microsoft Technology (.NET)

Date: *21st January 2022*

Organized by: *Department of Computer Science, Era University In Collaboration with: COSMO Info Solutions, Lucknow*

Introduction: The Department of Computer Science at Era University, in collaboration with COSMO Info Solutions from Lucknow, organized a highly informative workshop on "Microsoft Technology (.NET)" on the 21st of January 2022. The workshop aimed to provide participants with comprehensive insights into the .NET framework and its applications in modern software development.

The workshop commenced with an overview of the .NET framework, its architecture, and its significance in contemporary software development. Participants delved into C# programming, a fundamental language in .NET development. The workshop provided hands-on coding experience and practical exercises. The workshop explored ASP.NET, focusing on web application development using this technology. Participants learned about creating dynamic and interactive web applications. At the conclusion of the workshop, certificates of participation were awarded to all attendees. These certificates served as recognition of the participants' dedication and successful completion of the workshop.

The "Microsoft Technology (.NET)" workshop organized by the Department of Computer Science at Era University in collaboration with COSMO Info Solutions, Lucknow, was a resounding success. Participants left the workshop with valuable knowledge and practical skills in .NET development, ready to explore the exciting world of Microsoft technology. Era University remains committed to offering such enriching educational opportunities in the future.
